Subject: Quick Budget Question

Hey Brent,

I wanted to touch base on an item in EPA's budget that is of interest of the Senator.

This is from budget appendix re EPA building and facilities account

"This appropriation also funds the design of a new, consolidated federally-owned multi-use facility, including a lab, to replace the multiple EPA leased locations in Las Vegas, Nevada, several of which have leases that are expiring in the next few years. The new facility will have a smaller overall footprint than the current leased locations and will be designed to be energy efficient with lower anticipated operating cost."

Could you provide any additional details?

Thanks for any assistance you might be able to provide.

Jeremy B. Harrell

U.S. Senator Dean Heller (NV)

324 Hart Senate Office Building

Washington, DC 20510
